4 1/2" 20,000 lb. Hub & Spool for 2 Different Tile

\$6,600

Power Pack for Tile Cart

\$750

Installed for \$1,050

It is possible to put in 4" tile with a 6" boot. However, the 4" boot will require less horsepower to pull. All plows come with water level and brackets for mounting laser equipment. All boots are made of 3/8" steel; the lift plate is made of 1" steel. The bottom 30" of the point is two layers (AR400); giving a total thickness of 2" steel. All points come hard surfaced for longer life. Prices good through 6/30/16
